## Slide 2

---

**AM20** Lembrar o aluno que não precisa decorar, e que pode imprimir isso  
André Milani; 23/11/2011

## UIImage

- Imagem somente leitura
- Suporta a:

- .tiff
- .tif
- .jpg
- .jpeg
- .gif
- .png
- .bmp
- .bmpf
- .ico
- .cur
- .xbm

---

---

---

---

---

---

---

---

## UIAlertView

- Exibe um alerta na tela

---

---

---

---

---

---

---

---

## UIAlertView

- Sintaxe e exemplo:

```
UIAlertView *myAlert = [[UIAlertView alloc]
initWithTitle:@"Mensagem de alerta"
message:@"Meu primeiro alerta"
delegate:nil
cancelButtonTitle:@"OK"
otherButtonTitles:nil];
```

```
[myAlert show];
[myAlert release];
```

---

---

---

---

---

---

---

---

## UIAlertSheet

- Alerta ao usuário
- Solicita orientação/decisão
- UIAlertControllerDelegate
  - didDismissWithButtonIndex

## UIAlertSheet

- Sintaxe e exemplo:

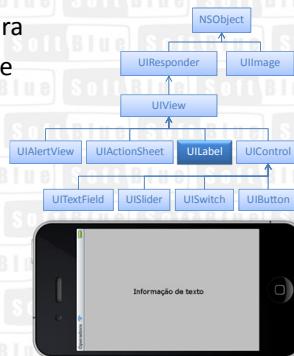

```
UIAlertSheet *myActionSheet = [[UIAlertSheet alloc]
initWithTitle:@"Deseja realizar esta operação?"]
delegate:self
cancelButtonTitle:@"Não"
destructiveButtonTitle:@"Sim"
otherButtonTitles:nil];
```

```
[myActionSheet showInView:self.view];
[myActionSheet release];
```

```
-(void)actionSheet:(UIAlertSheet *)actionSheet
didDismissWithButtonIndex:(NSInteger)buttonIndex
{
}
```

## UILabel

- Texto somente leitura
- Formatação da fonte

## UILabel

- Principais propriedades:
  - **text** Permite manipular o texto da label

---

---

---

---

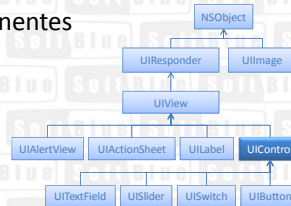

---

---

---

## UIControl

- Controle de componentes
- Controle de estado
  - state
  - enabled
  - selected
  - highlighted
- Constante UIControlEvents
  - TouchDown
  - TouchUpInside
  - DidEndOnExit

---

---

---

---

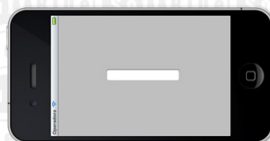

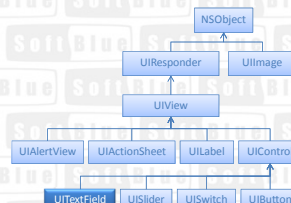

---

---

---

## UITextField

- Texto para edição
- Principais teclados
  - Default
  - URL
  - Numérico
  - Telefone
  - Nome
  - E-mail
- Implementação
  - didEndOnExit
  - touchDown (view)

---

---

---

---

---

---

---

## UITextField

- Principais propriedades:
  - **text** Permite gerenciar o conteúdo do campo
  - **placeholder** Permite gerenciar o conteúdo do placeholder do campo

---

---

---

---

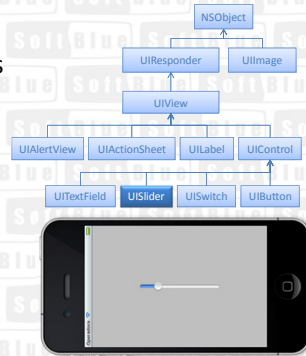

---

---

---

## UISlider

- Potenciômetro
- Intervalo de valores
- Implementação
  - **valueChanged**

---

---

---

---

---

---

---

## UISlider

- Principais propriedades:
  - **value** Permite gerenciar o valor do slider (posição atual)

---

---

---

---

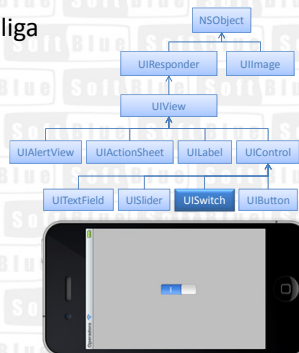

---

---

---

## UISwitch

- Interruptor liga/desliga

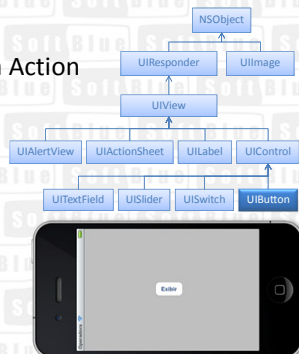

## UISwitch

- Principais propriedades:
  - **on** Permite verificar se o swith está definido como ligado ou desligado

## UIButton

- Botão
- Vinculado com uma Action
- **touchUpInside**

## UIButton

- Principais métodos:
  - **setTitle** Permite alterar o título do botão diretamente por linhas de código
